

LED Dimmer

Now you can adjust the intensity of your LED Lighting!

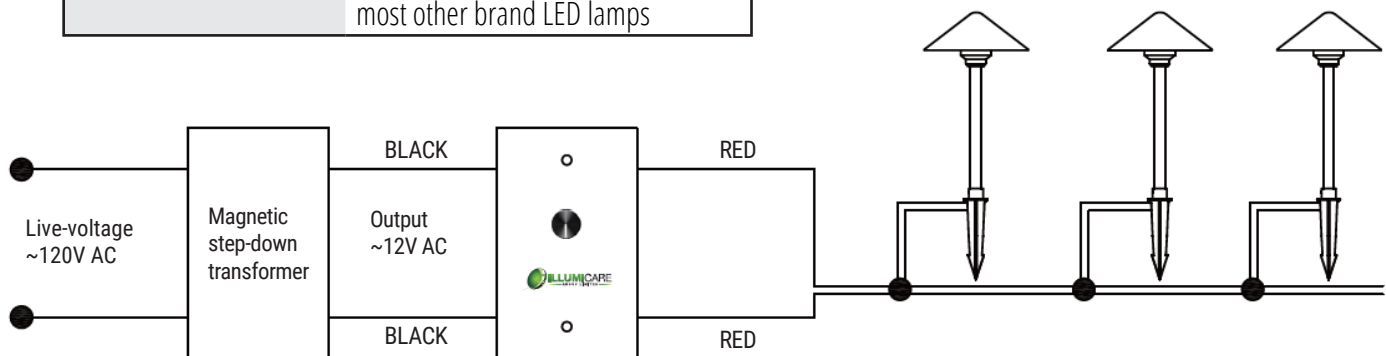

The Illumicare LED Dimmer provides flexible control over the brightness of all Illumicare dimmable LED lights, lamps and fixtures. It allows you to create the desired ambiance and save energy by reducing light output when needed.

The Illumicare LED Dimmer provides 12 VAC dimming for up to 8A (96 Watts @12VAC). The dimmer may be mounted next to the 12 VAC transformer or anywhere inline. It is compatible with all Illumicare dimmable LED lamps and fixtures.

5 YEAR
Warranty

Construction	Brass Faceplate
Dimensions	7cm W x 11.4cm H & (4.5cm D)
Wattage	Maximum 96 W
Operating Range	12 VAC
Capacity	Maximum 8 Amps
Minimum Load	None
IP	53
Recommended Use	Compatible with all Illumicare and most other brand LED lamps

Note: All 12V LED devices will dim differently. The trim pot switch will need to be adjusted for wattage loads and or 12V dimmable LED products. This LED dimmer is made for 12VAC Transformers only. Do not exceed 96 WATTS on the field load.
