

PRECISION ENGINEERED PATH LUMINAIRES

Our finely-machined small path luminaire, Aphrodite, offers a sleek, compact design constructed of heavy-gauge copper, and includes a telescoping stem to increase the height of the fixture from 19 to 33 inches.

Aphrodite's is a durable, discreet fixture with an innovative design which allows you to modify and control the light pattern produced to meet your lighting needs.

With two options for increasing the light intensity and spread, Aprodite is the perfect combination of style, and function to accommodate any path lighting application.

- As your plant material grows, Aprodite's telescoping stem allows you to adjust the height by 14 inches without using any tools.
- Quickly increase or decrease the height of the lamp basket by threading the brass bushing up or down to control the light output and beamspread pattern.

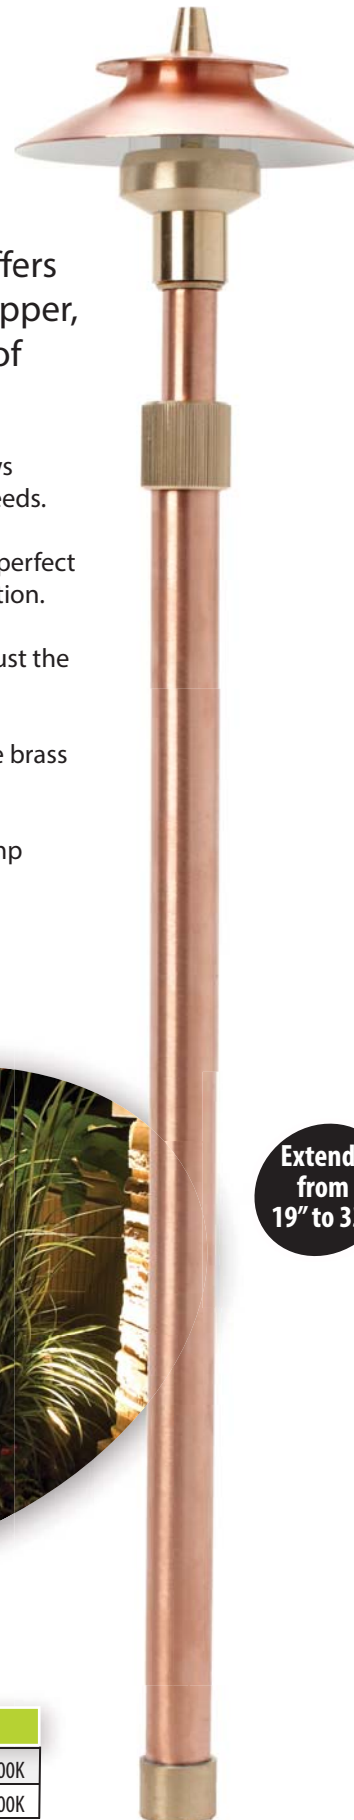

Aphrodite's clear glass lens offers superior 270° optics while protecting the lamp from moisture and debris.

This fixture is ideal for lighting paths and illuminating small plant material in low planter beds, architecture, or around hardscape borders.

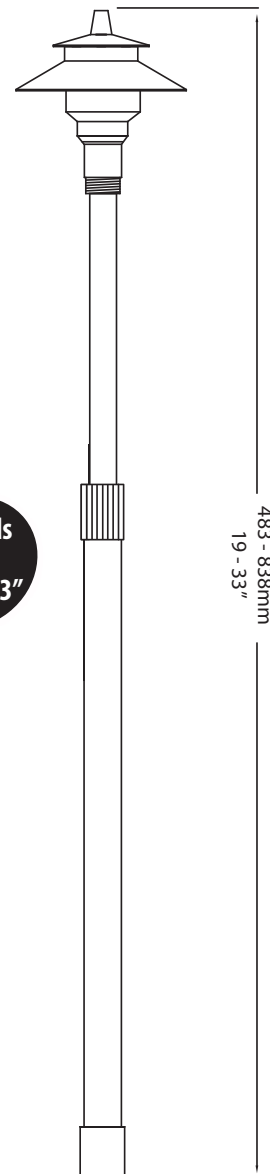

APHRODITE

Construction:	Heavy-Gauge Copper
Dimensions:	4" x 19 to 33"
Lamp:	LED 19mm G4 Bipin*
Wattage:	Maximum 20 Watts
Lens:	1/8" Tempered Glass
