

Extendable Solid Brass Path & Area Fixtures

Aspen, our elegant wide-brimmed area light, offers glare-free path and walkway illumination.

Constructed of solid machined brass, Aspen is ideal for low-level lighting along front drives, walkways, borders, and entranceways, leading guests safely through your landscape design.

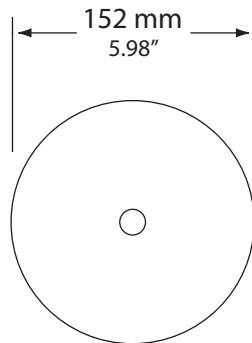

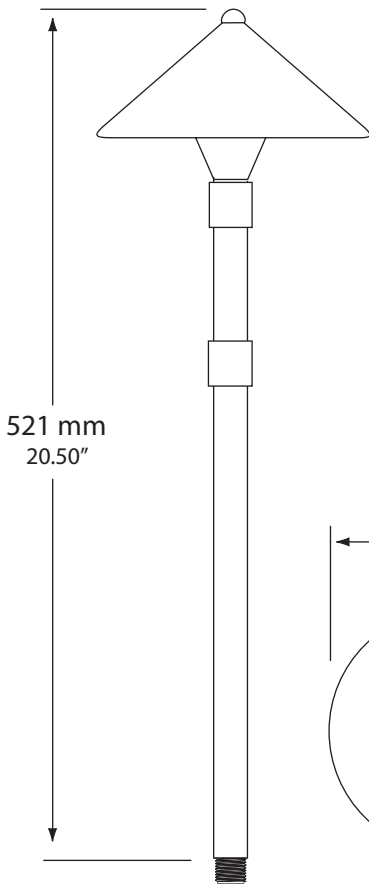

The pathlight's extendable stem allows you to increase the height as your plant life grows.

To protect the lamp and socket from water, moisture and debris, Aspen's elegant brass construction includes a shock-proof clear glass lens.

Aspen produces low-level, evenly dispersed, circular patterns, which could also be used to enhance decorative accents in tiered plant beds, hardscapes or walkways.

Extends from 20" to 32"
